**BUILT-IN
APPLIANCES**

KITCHENS ARE NO LONGER JUST A COOKING PLACE BUT A LIVING SPACE OR A TRENDY GATHERING VENUE WHICH SPICE UP OUR LIVES.

OUR DISTINCT COLLECTION MAKES LIFE IN THE KITCHEN A DAILY PLEASURE; ENJOY THE INNOVATION AND DESIGN, STYLE AND VERSATILITY. WHATEVER YOU ARE COOKING IN YOUR KITCHEN YOU CAN FIND PERFECT PARTNER IN SIMFER UNLIMITED DESIGN APPLIANCES.

Since 1977 Simfer offering a wide choice of combination for different cooking cultures. Today meals are cooked with Simfer quality and aesthetic products in Turkey and more than 126 countries. When Simfer develop new appliances, we are both keeping pace with our customer demands and meeting principle of protecting environment.

Our products are not only to improve your life quality but for the better future as well. Today Simfer has become one of the most prestigious cooking appliances manufacturers in Europe with our cut-edge technology, high production capacity, knowledge based R&D facilities and fully equipped experienced team.

simfer

Unlimited Designs

The quality of the materials used, the constant research in the design stage and the meticulous control on the production process ensure that our guarantee always applies.

Our ovens are perfectly compatible with all standard built in installation methods. The front is perfectly aligned with the surface of the cabinet and is available in glass steel or colored enamel.

We can cover full certification for different market requirements. We are capable of improve our products with complete tests in our fully equipped R&D laboratories to bring you perfect Simfer appliances. We take environmental responsibility seriously due to our product engineering and production. Our products perform to the highest standard and last long life cycle.

FOR THOSE WHO DESIRES TO TURN COOKING INTO PLEASURE.

Simfer aims to give you cooking pleasure, difference and simplicity with its state of art built in products. Using high technology, Simfer gives indulgence for all different cooking cultures.

Top / Bottom Function

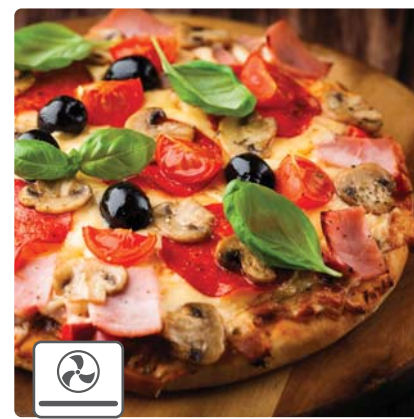

In Top / Bottom heating function; oven cooks with using Top-Bottom heating element. It's the classical cooking function to bake Biscuits, Cakes and Soufflés.

Bottom Heating

Bottom element heats oven from bottom only. It's ideal for baking Pie which requires bottom cooking.

Top Heating

Oven is heated by Top element only. It is ideal for lasagna which just require gentle browning.

Top / Bottom Heating Turbo Fan Bottom Heating

Turbo fan function provides hot air circulation homogenously within the oven. This function creates best cooking experience.

Turbo Heater + Turbo Fan

This function heats up the oven faster, lower temperatures and shorter cooking times are used to achieve mouthwatering results with through fan cooking. With fan cooking system hot air circulates through the cavity allowing you to cook sweet and savory taste.

Pizza Function

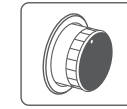

Great baking result with the bottom heating element, fan, fan heating element which is designed to ensure Pizzas are cooked to your taste.

PRODUCT DETAILS

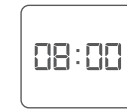

A ENERGY CLASS

A-Class energy efficiency, Simfer provides excellent cooking performance with low-energy consumption.

POP-UP BUTTON

Pop in / Pop out knobs attractively styled to add value to create excessive design at Simfer Built in Ovens.

DIGITAL PROGRAMMING TOUCH CONTROL

Easy to use and highly responsive touch control LCD fully electronic display gives precise control of all the oven's function.

DEFROSTING

Defrost your frozen food gently; air is circulated around the oven cavity and defrosting food precisely.

SPACIOUS VOLUME

64lt. large cooking space enable to prepare king feasts to welcome more guests. This large interior provide room to roast poultry for all your family.

CHILD LOCK

Simfer is thinking of Children. The safety lock feature allows you to lock the control to prevent children from activating the oven.

THE FUNCTIONAL TOUCH TO YOUR KITCHEN WITH SIMFER TECHNOLOGY...

Simfer standart options meets all your cooking expectations. Wide range of cooking options are designed to satisfy some one who expect more...

Fan with Grill

Heat from the top element is circulated by the fan, sealing and crisping the food. Such as chicken fillets, meat cutlet and crispy fish.

Low Grilling

This option is ideal for relatively small amount of food to grill such as toast or snacks. Low grill function activates without top heating element which means energy is used in effective way.

Strong Grilling

This option is perfect for quick grilling. Grill your favorite meat or fish with your special recipes.

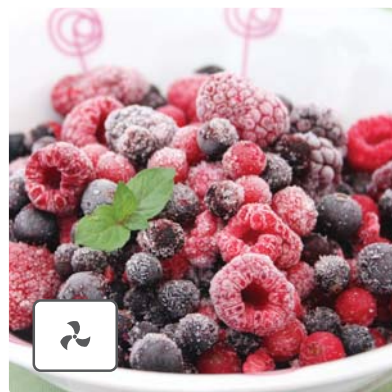

Warm Keeping

This option can be used to keep cooked meals warm on the side, also you can warm up your plates or cups before serving.

Strong / Low Grilling + Turnspit

With this option large joints or poultry can roast with precise heat circulation and exact temperature control. The result is perfect cooking in every sides of the meat.

De-Frosting

DE-Frost your frozen food gently and hygienically. Air is circulated around the oven cavity quickly and defrost your food.

COOLING FAN

Cooling fan system helps to keep the appliance cool and protects surrounding units. Air venting out through the front of the oven helps to keep the control panel and the handle area cool.

EASY CLEAN ENAMEL

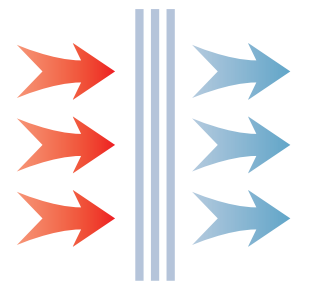

All our ovens are equipped with the innovative easy to clean system. (ETC) The special formula of ETC enamel prevents dirt sticking to the inner walls and makes cleaning easier.

With three layers of oven glass surface the temperature of the door never exceed the maximum limits during cooking. This feature prevents any accidental burns.
